

Tom Warren

Vice President, Specialty Polymers Americas

Tom Warren is the Vice President of Specialty Polymers for INEOS Styrolution America and is based in Aurora, Illinois. INEOS Styrolution is the leading producer of styrenic resins with world-class production facilities throughout the world. Warren is responsible for business management of a diverse collection of specialty styrenic polymers used in a variety of industries ranging from Automotive to Food Packaging to Healthcare.

He began his 18 year career in the styrenics industry with BASF as an operations engineer at the polystyrene manufacturing facility in Channahon, Illinois (now owned by INEOS Styrolution). He later served in product and business management roles for polystyrene in predecessor companies including the INEOS Nova joint venture, INEOS Styrenics and BASF. Prior to his current role, Warren served as Styrolution's director of global strategy for polystyrene and ABS at the global headquarters in Frankfurt Germany. In 2014, he returned to the US to assume his current role.

Warren earned an MBA from Northwestern University Kellogg School of Management and holds a Bachelor of Science degree in chemical engineering from the University of Michigan.

ABOUT INEOS STYROLUTION

INEOS Styrolution is the leading, global styrenics supplier with a focus on styrene monomer, polystyrene, ABS Standard and styrenic specialties. With world-class production facilities and more than 85 years of experience, INEOS Styrolution helps its customers succeed by offering the best possible solution, designed to give them a competitive edge in their markets. The company provides styrenic applications for many everyday products across a broad range of industries, including automotive, electronics, household, construction, healthcare, toys/sports/leisure, and packaging. In 2015, sales were at 5 billion euros. INEOS Styrolution employs approximately 3,100 people and operates 15 production sites in nine countries.
