

Don Loftis

Principle Software Engineer / Rail Security Coordinator

Don has spent his entire career of 37 years with Olin corporation. He holds several patents related to electrical circuit design, chemical process improvements and process control theory. In his early years with Olin, he co-authored a Distributed Control System that Olin used internally to make their products. In the last decade, Don has focused on crisis management and developing track and trace solutions for Olin. He is involved with the Transportation Research Board and has authored a few studies on Application of emerging technologies to transportation. He also chairs eastern region of the TDOT Freight Advisory committee. He is a pilot (airplane, glider), scoutmaster, and volunteers for American Red Cross during national disasters.
